

Cyrod Technologies Inc. Signs Partnership with Amfeltec

Toronto, Canada, January 18, 2010 – Cyrod Technologies Inc., a leading supplier of MCUs today announced a partnership with Amfeltec, a manufacturer of PCI and PCI Express Development Tools and Debuggers to expand its global sales reach in key markets worldwide.

Cyrod will now offer Amfeltec's complete range of products which include PCI Cable Extenders, PCI Backplanes, In Circuit Programmers, PCI to PCI Express Adapters, PCI Express Extenders and a host of other patented and innovative products.

"PCI has now become ubiquitous and the partnership of Cyrod and Amfeltec will enable designers to use advanced tools in the development and design of advanced connectivity systems", said Mike Nicholas Marketing Director of Cyrod. "We welcome the opportunity to leverage Cyrod's worldwide sales channel and customer base to help Amfeltec drive the widespread adoption of the company's products"

Amfeltec products will be offered by Cyrod both through its rep and distribution worldwide sales channel.

Amfeltec's products are fully supported by comprehensive documentation, applications and technical support as well as sales, marketing and customer service.

About Cyrod Technologies

Cyrod Technologies Inc., is a fabless semiconductor company focused on the 8051 microcontroller unit (MCU) market. In October 2006, Cyrod announced that it had completed an agreement with Ramtron International Inc., to acquire Ramtron's 8051 production MCU business (formerly Goal Semiconductor). Corporate headquarters are located at 4261 Highway 7, East, Suite 290, Markham, ON Canada. Telephone: +1.905.910-0611. For more information on Cyrod's MCU products, please visit our web site at www.cyrod.com.
